TUE: DAY BVENING, SEPT. 14.

A party of young people were sailing near Nantucket last week, when one of the young laties expressed a desire to touch the bell bouy, and the boat was accordingly run alongside. It was then suggested that she step upon the bouy, which she did, when the wash of the sea carried the boat out of her reach and it drifted off to leeward, leaving her standing upon the sloping roof of the hollow tub, which bobbed up and down on the waves and careened from side to side in a most uncomfortable manner. Before she could be taken on board it was necessary to make two tacks when the boat was worked up near enough to throw a line, which was caught and made fast with trembling hands by the young lady, who was soon taken off seasics and exhaused, after remaining on the bouy about fifteen minutes.

PROCE OF DEATH - For two or three hours after the stoppage of the heart the whole of the muscles of the body have completely lost their electric exectability. When stipulated by electricity they no longer contract. If, then, when faradism is applied to the muscles of the limes and tounk, say five or six hours after suppes d death, there be no contractible response it may be certified bey and all deubt that death has taken place, for no faint nor rance, nor come, he werer deep can prevent the manifestetten of electric museular contractility. Here there is no possibility of mistake, as there certainly was when the old tests were employed.
